### What happens at an EQ-HR Workshop?

This core EQ HR Center workshop is an intensive five-day session designed to enable participants to learn about, build and practice emotional intelligence skills in a small group setting. Skilled facilitators provide tools and feedback to enable participants to learn about themselves and to immediately practice emerging skills. The content of the workshop revolves around the five areas of emotional intelligence as keys to improving leadership effectiveness for faith-based leaders. They are: **Self-Perception**—Having a solid understanding of oneself, one's emotions and one's inner life. **Self-Expression**—Being able to openly and honestly express one's true thoughts and feelings. **Interpersonal**—Having a healthy network of relationships. **Decision Making**—Feeling competent, calm and grounded in one's ability to use emotional information to make decisions. **Stress Management**—Feeling resilient in the face of adversity and armed with an arsenal of coping strategies.

### What is the ESCI 360 Survey?

As part of this core event, workshop participants complete a comprehensive self-assessment of their emotional intelligence. They also identify up to 20 people (manager(s), direct reports, peers, clients, family and friends) who know them well and are willing to complete the same assessment in order to provide valuable feedback. What results is a detailed report of one's Emotional Intelligence strengths and development needs. This will be for the participant's eyes only and will provide possible personal items to be explored in one's small group.
